

## ALESSANDRO BERTOLI – PUBLICATIONS

NORANTE RP, MASSIMINO ML, LORENZON P, DE MARIO A, PEGGION C, VICARIO M, ALBIERO M, SORGATO MC, LOPREIATO R, BERTOLI A (2017) Generation and validation of novel adeno-associated viral vectors for the analysis of Ca(2+) homeostasis in motor neurons. **Sci. Rep.** 7, 6521

DE MARIO A, PEGGION C, MASSIMINO ML, VIVIANI F, CASTELLANI A, GIACOMELLO M, LIM D, BERTOLI A, SORGATO MC (2017) The prion protein regulates glutamate-mediated Ca(2+) entry and mitochondrial Ca(2+) accumulation in neurons. **J. Cell Sci.** 130, 2736-2746

PEGGION C, MASSIMINO ML, BIANCOTTO G, ANGELETTI R, REGGIANI C, SORGATO MC, BERTOLI A, STELLA R (2017) Absolute quantification of myosin heavy chain isoforms by selected reaction monitoring can underscore skeletal muscle changes in a mouse model of amyotrophic lateral sclerosis. **Anal. Bioanal. Chem.** 409, 2143-2153

PEGGION C, BERTOLI A, SORGATO MC (2017) Almost a century of prion protein(s): From pathology to physiology, and back to pathology. **Biochem. Biophys. Res. Commun.** 483, 1148-1155

LIM D, BERTOLI A, SORGATO MC, MOCCIA F (2016) Generation and usage of aequorin lentiviral vectors for Ca(2+) measurement in sub-cellular compartments of hard-to-transfect cells. **Cell Calcium** 59, 228-239

MASSIMINO ML, PEGGION C, LORO F, STELLA R, MEGIGHIAN A, SCORZETO M, BLAAUW B, TONIOLO L, SORGATO MC, REGGIANI C, BERTOLI A (2016). Age-dependent neuromuscular impairment in prion protein knock-out mice. **Muscle Nerve** 53, 269-279

DE MARIO A, CASTELLANI A, PEGGION C, MASSIMINO ML, LIM D, HILL AF, SORGATO MC, BERTOLI A (2015) The prion protein constitutively controls neuronal store-operated Ca(2+) entry through Fyn kinase. **Front. Cell. Neurosci.** 9, 416

ZANETTI F, CARPI A, MENABÒ R, GIORGIO M, SCHULZ R, VALEN G, BAYSA A, MASSIMINO ML, SORGATO MC, BERTOLI A, DI LISA F (2014) The cellular prion protein counteracts cardiac oxidative stress. **Cardiovasc. Res.** 104, 93-102

PEGGION C, SORGATO MC, BERTOLI A (2014) Prions and prion-like pathogens in neurodegenerative disorders. **Pathogens** 3, 149-163

MASSIMINO ML, REDAELLI M, BERTOLI A, SORGATO MC, MUCIGNAT-CARETTA C (2013) Altered behavioral aspects of aged mice lacking the cellular prion protein. **Physiol. & Behav.** 119, 86-91

STELLA R, CIFANI P, PEGGION C, HANSSON K, LAZZARI C, BENDZ M, LEVANDER F, SORGATO MC, BERTOLI A, JAMES P (2012) Relative quantification of membrane proteins in wild-type and prion protein (PrP)-knockout cerebellar granule neurons. **J. Proteome Res.** 11, 523-536

PEGGION C, BERTOLI A, SORGATO MC (2011) Possible role for Ca<sup>2+</sup> in the pathophysiology of the prion protein? **Biofactors** 37, 241-249

DIBATTISTA M, MASSIMINO ML, MAURYA DK, MENINI A, BERTOLI A, SORGATO MC (2011) The cellular prion protein is expressed in olfactory sensory neurons of adult mice but does not affect the early events of the olfactory transduction pathway. **Chem. Senses** 36, 791-797

LAZZARI C, PEGGION C, STELLA R, MASSIMINO ML, LIM D, BERTOLI A, SORGATO MC (2011) Cellular prion protein is implicated in the regulation of local Ca<sup>2+</sup> movements in cerebellar granule neurons. **J. Neurochem.** *116*, 881-890

STELLA R, MASSIMINO ML, SORGATO MC, BERTOLI A (2010) Prion and TNF-alpha: TAC(E)it agreement between the prion protein and cell signalling. **Cell Cycle** *9*, 4616-4621

STELLA R, MASSIMINO ML, SANDRI M, SORGATO MC, BERTOLI A (2010) Cellular prion protein promotes regeneration of adult muscle tissue. **Mol. Cell. Biol.** *30*, 4864-4876

SORGATO MC, PEGGION C, BERTOLI A (2009) Is, indeed, the prion protein a Harlequin servant of "many" masters? **Prion** *3*, 202-205

SORGATO MC, BERTOLI A (2009) From cell protection to death: may Ca<sup>2+</sup> signals explain the chameleonic attributes of the mammalian prion protein? **Biochem. Biophys. Res. Commun.** *379*, 171-174

GENOVESI S, LEITA L, SEQUI P, ANDRIGHETTO I, SORGATO MC, BERTOLI A (2007) Direct detection of soil-bound prions. **PLoS One** *2*, e1069

LEITA L, FORNASIER F, DE NOBILI M, BERTOLI A, GENOVESI S, SEQUI P (2006) Interactions of prion proteins with soil. **Soil Biol. Biochem.** *38*, 1638-1644

SORGATO MC, BERTOLI A (2006) Physiopathologic implications of the structural and functional domains of the prion protein. **Ital. J. Biochem.** *55*, 222-231

MASSIMINO ML, FERRARI J, SORGATO MC, BERTOLI A (2006) Heterogeneous PrPC metabolism in skeletal muscle cells. **FEBS Lett.** *580*, 878-884

MASSIMINO ML, BALLARIN C, BERTOLI A, CASONATO S, GENOVESI S, NEGRO A, SORGATO MC (2004) Human Doppel and prion protein share common membrane microdomains and internalization pathways. **Int. J. Biochem. Cell Biol.** *36*, 2016-2031

BIASINI E, FIORITI L, CEGLIA I, INVERNIZZI R, BERTOLI A, CHIESA R, FORLONI G (2004) Proteasome inhibition and aggregation in Parkinson's disease: a comparative study in untransfected and transfected cells. **J. Neurochem.** *88*, 545-553

FORLONI G, TERRENI L, BERTANI I, FOGLIARINO S, INVERNIZZI R, ASSINI A, RIBIZZI G, NEGRO A, CALABRESE E, VOLONTÉ MA, MARIANI C, FRANCESCHI M, TABATON M, BERTOLI A (2002) Protein misfolding in Alzheimer's and Parkinson's disease: genetics and molecular mechanisms. **Neurobiol. Aging** *23*, 957-976

NEGRO A, , BERTOLI A, MASSIMINO ML, SORGATO MC (2001) The metabolism and imaging in live cells of the bovine prion protein in its native form or carrying single amino acid substitutions. **Mol. Cell. Neurosci.** *17*, 521-538

MEGGIO F, NEGRO A, SARNO S, RUZZENE M, BERTOLI A, SORGATO MC, PINNA LA (2000) Bovine prion protein as a modulator of protein kinase CK2. **Biochem. J.** *352*, 191-196

NEGRO A, MEGGIO F, BERTOLI A, BATTISTUTTA R, PINNA LA (2000) Susceptibility of the prion protein to enzymic phosphorylation. **Biochem. Biophys. Res. Commun.** *271*, 337-341

BALLARIN C, BERTOLI A, WOJCIK G, SORGATO MC (1996) Mitochondrial inner membrane channels in yeast and mammals. **Soc. Gen. Physiol. Ser.** 51, 155-171

BERTOLI A, MORAN O, CONTI F (1996) Accumulation of long-lasting inactivation in rat brain K(+)-channels. **Exp. Brain Res.** 110, 401-412

BERTOLI A, MORAN O, CONTI F (1994) Activation and deactivation properties of rat brain K<sup>+</sup> channels of the Shaker-related subfamily. **Eur. Biophys. J.** 23, 379-384
